

# BROADBENT GRÜNER VELTLINER

100% Grüner Veltliner. Delicate fresh green apple fruity aromas. Solid fruit core with plenty of lemon, lime, peach and green apple flavors. A juicy white wine, rich in finesse, with beautiful length and mineral tones.

Elegant and delicious. The ideal wine for seafood, white meat and light dishes like salads; also very pleasant as a refreshing summer wine on a hot day, or just to be enjoyed by itself. Organic.

The Niederösterreich region in lower Austria has a cool continental climate growing area with the Danube river as its lifeline. It is the biggest quality wine region in Austria. The sites chosen for this Grüner Veltliner are a mixture of different vineyards (50% Traisental, 25% Kremstal and 25% Weinvertal) with mainly conglomerate and loess soils. The vineyards south of the Danube, which are located in the lower lands regions, have more loess soil. This is the only Austrian region where Grüner Veltliner and Riesling are grown on limestone. The vineyards are on a slope running North to South and are either East facing or South East facing. Selection of only physiologically ripe grapes are crushed, cooled, and have skin contact for 2 hours. Grapes are whole bunch pressed and fermented in stainless steel at 64°F, with 3 months lees contact in stainless steel.

The winemaker is Markus Huber. The Broadbent name has been synonymous with fine wine for more than four decades, beginning with the renowned career of British wine critic, writer and auctioneer Michael Broadbent and continuing with his son, the importer Bartholomew Broadbent. Bartholomew Broadbent has partnered with family-owned wineries around the globe to produce wines rich with the essence of place and tradition. Broadbent wines represent authentic character and infinite pleasure.
